## Abstract

This is a style guide for Latex papers for use by graduate students at the University of Houston. Notice that this is **not** centered on the page. Having it centered with make it look ragged. It should be flush left. I have also put in a no-indent command, so that the abstract does not indent. This gives the abstract a nice block look. The title page should have an empty page style, so that no page number appears. Put the keywords and JEL codes inside the abstract environment so they are sized appropriately and are flush with the abstract.

**Keywords:** separated by commas, words or short phrases

**JEL classification:** O1, M1, or other JEL codes

---

\*Contact information. I am not a huge fan of the asterisk next to the title, but it isn't obvious where this should go. You could alternatively use one of the authors - preferably the corresponding author.

# 1 Introduction

Pulling in my tables.

Table 1: Estimates of Education Effect, by Country

	Dependent variable:					
	Log wages:			Hours worked (wk):		
	(1)	(2)	(3)	(4)	(5)	(6)
Panel A: Albania						
Education in Years	0.026 (0.005)	0.044 (0.005)	0.034 (0.007)	-0.362 (0.077)	-0.053 (0.086)	0.250 (0.118)
R-squared	0.01	0.09	0.11	0.01	0.08	0.11
Observations	2382	2382	2382	2396	2396	2396
Panel B: Bangladesh						
Education in Years	0.063 (0.002)	0.066 (0.002)	0.049 (0.002)	0.306 (0.041)	0.037 (0.049)	0.168 (0.054)
R-squared	0.25	0.30	0.40	0.02	0.10	0.12
Observations	6898	6898	6898	6898	6898	6898

**Notes:** Really, really smart regressions like this take a lot of work.
